

REMACK[®] CYLINDER HEADS

Made for Mack. By Mack.

What will your truck be in its second life? A collection of aftermarket parts or 100 percent Mack? Mack's remanufactured cylinder heads are inspired by over a century of commitment to hard-working quality. Originally designed by Mack engineers and remanufactured by Mack-trained technicians, and then backed by a 100 percent parts one-year warranty.

REMACK Cylinder Heads.

**The performance you've come to expect from Mack.
Remanufactured and ready to work.**

REMACK Cylinder Heads are remanufactured under the eye and hand of a Mack-trained technician, and produced following stringent processes that include:

- Electro-magnetic crack detection
- Valve and valve seat inspection and machining
- Replacement of valve guides and rotators with 100 percent new parts
- Engineering updates incorporated during remanufacturing
- Multi-point detailed inspections

Mack is confident these parts will perform. So confident that we back them with a 100 percent parts warranty for one full year / unlimited miles.

Every REMACK Cylinder Head is engineered with the latest updates to match your Mack truck.

New parts installed:

- Valve guides
- Rotators

Remanufactured parts – inspected and machined:

- Valve seats
- Valves

Engineering updates made:

- Conical injector cups on HDEP heads

The REMACK Cylinder Head complete package includes:

- Valves
- Valve guide seals
- Heavy-duty valve springs
- Rotators
- Keepers
